concrete basin 1000

Item number: 20074013

Westerberg’s concrete washbasin, handcrafted and featuring a unique, softly shaped design. Each piece is unique and the surface is vibrant with variations in colour. The inside and top of the washbasin are sealed to close the pores in the concrete, making it more stain-resistant. Natural pores may be visible on the outside of the washbasin.

No overflow protection. Please purchase a bottom valve and drain kit separately.

Detailed information

Item number	
EAN	7333231011815
Standards and classifications	
ETIM	EC011550
Product dimensions and weight	
Width	1010
Depth (mm)	465
Height (mm)	140
Net weight (kg)	32

Material and surface treatment	
Main material	Concrete
Color	Dapple-grey
Packaging dimensions and weight	
Package height(m)	0,210
Package width (m)	1,070
Package depth(m)	0,520
Package weight(kg)	32,000

Care instructions

Concrete is a rustic material with natural variations in colour and surface. The material is porous and the surface of the basin has both been hardened and sealed to make the surface more resistant to stains. Treat the surface of the sink with wax (e.g. car wax) every 6 months. The surface can be damaged by abrasive sponges, scrubbing powder and similar products, which eventually leads to stains and damages that can’t be repaired. Wipe of water drops with a soft cloth after use to avoid lime coating. If water is left standing in the basin, dark areas may occur which disappear after a few hours. Do not expose the washbasin to water with a temperature higher than 60°C or rapid temperature changes. Clean the washbasin with a damp cloth or sponge and possibly a little mild detergent. Avoid steel wool, abrasive sponges etc. Avoid cleaners and products containing abrasives, acids, ammonia, acetone or other chemicals (e.g. scrubbing powder, hair spray, hair colour, bleach, hair removal and nail polish remover etc.). Should you spill any of the above products on the wash basin it should be removed immediately to
