

basin jord

Item number: 20073180

Round freestanding concrete washbasin. Combined with a tall mixer mounted on the countertop. The washbasin does not have an overflow prevention device. The sink is handmade, which means variation in color and shape.

Detailed information

Item number		Material and surface treatment	
RSK	7539538	Main material	Concrete
EAN	7333231000529	Color	Dark grey
Standards and classifications		Packaging dimensions and weight	
EN standard	EN14688	Package height(m)	0,430
CE marked	Yes	Package width (m)	0,430
ETIM	EC011550	Package depth(m)	0,020
Product dimensions and weight		Package weight(kg)	8,000
Width	365		
Depth (mm)	365		
Height (mm)	115		
Net weight (kg)	7		

Care instructions

Concrete is a rustic material with natural variations in colour and surface, the material ages when used. Treat the surface of your concrete wash basin regularly, you will find a remedy for concrete at well-stocked specialist retailers. The inside of the washbasin is sealed to close pores and make the surface more resistant to stains. Wipe of water drops with a soft cloth after use to avoid lime coating. If water is left standing in the basin, dark areas may occur which disappear after a few hours. Do not expose the washbasin to water with a temperature higher than 60 ° C or rapid temperature changes. Clean the washbasin with a damp cloth and possibly a little diluted detergent. Always use a soft cloth, avoid steel wool and the like. Avoid cleaners and products containing abrasives, acids, ammonia, acetone or other chemicals (eg scrubbing powder, hair spray, hair colour, bleach, hair removal and nail polish remover etc.). Should you spill any of the above products on the wash basin it should be removed immediately to avoid damage.
